ERRATUM FOR NPIC

25X1

In the MISSION COVERAGE INDEX for MISSION 4016, 13-16 March 1965, substitute the following write-up under CHITA UNIDENTIFIED INSTALLATION, page 144, line 29.

Rail-served area 5.5 nm NW of Chita on the north shore of Lake Kunhovka contains 3 separate areas, a large building under construction, a power plant under construction, and a housing/support area.

The large building under construction, 2 nm north of the lake, consists of 2 parallel bays with a third bay connecting the other 2 at the east ends. Foundations for another connecting bay are visible at the west end of the building. Footings and bases for uprights indicate preparation for roofing over the entire structure. When completed the building will measure approximately 2,000 by 500 feet and contain approximately 1,000,000 square feet of roof cover. A support area containing a batch plant, 5 buildings, and open storage for construction materials is located west of the building.

The power plant under construction, on the north shore of the lake, consists of a completed boiler/generator house

and a transformer yard. The boiler/generator house is being expanded and when completed will nearly double the size of the plant.

A housing/support area 2 nm north of the power plant contains 17 apartment/barracks and 5 other buildings under construction. A separately secured industrial/utility area within the support area contains a possible foundry building, 3 shops, several small buildings, and open storage. A secured area NW of the other area contains 7 large storage buildings, 14 small buildings, and several vehicles. Another previously reported storage area was not covered on this mission.
